### "Nasty Nocturnal Nymphomaniacs"

### --THE PLOT

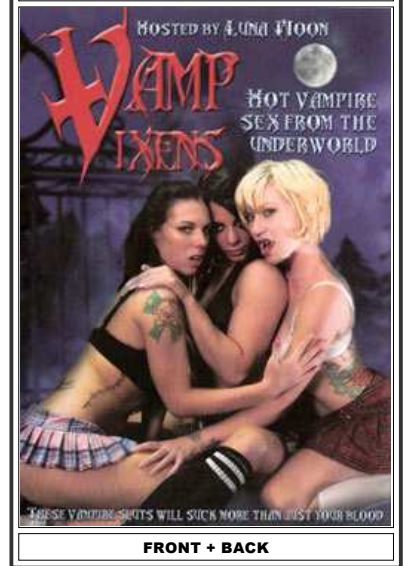

There is no story, come on, it's porn. What you get is a sequence of vignettes held together by your hostess with the moistest Luna Moon. This hard edged soft core film (despite the X rating on the slick) is strictly for fans of tattooed, pierced gals with fangs. Yes, I'm talking to you guys who dig the Suicide Girls and their ink. The fangs look good, the babes aren't too shabby, the clothes have that fetish edge - nurse outfit, leather, lace, schoolgirl skirt etc but there's no hardcore to be had.

Guessing direct to HD but what do I know? It looks good I can tell you that.

**--AUDIO**

Is just your average 2.0 Dolby Digital with a lot of humping, ass slapping and moaning and groaning cum shots.

**--EXTRAS**

A couple trailers from Brookland and Bros Ent, thats about it.

**--FINAL THOUGHTS**

Disappointing really, I was actually expecting a storyline. Silly me. The fangs are the gimmick as well as the Suicide Girl look but otherwise it's just another quickie. This would look great projected on the wall at some late night dingy Goth club but I for one won't be there to see it. Some of the gals look the goods but some of the others?? A tattooed bush-pig is still a bush-pig.
