

The Dali Dimension
Decoding The Mind Of A Genius

**THE DALÍ
DIMENSION:
DECODING THE
MIND OF A GENIUS**
(MVD)

Nineteen years after his death, Salvador Dalí remains controversial, equally pilloried for his relentless showmanship and lauded for his artistic genius. Distributed by The Salvador Dalí Society, it's not surprising that this doc virtually ignores Dalí's private life (including the enormous influence of wife Gala) in favour of examining the influences of science and religion on the Catalanian's art.

Verdict: Period interviews with Dalí, rare archival footage and talking head interviews with art historians and scientists sheds light on his often indecipherable work.

Key extras: 'Dalí and the origin of life', 'The fascination with anti-matter'
