

THE DALI DIMENSION Decoding The Mind Of A Genius (MVD Visual) by Chris Forbes

-

This is not even a music DVD so I had no idea why this would be sent to David and I watched some of this, but I admit not all of it. This is a DVD about a guy named Salvador Dali who was a painter and this delps into stuff about his painting and things. For me I just found this boring as I am not a fan of paintings at all. I tried to watch this with an open mind and I will say some of his paintings were different and stuff, but this to me was just boring. Info: www.mvdb2b.com
