Here's something I didn't know: Author / artist / owner of an epic beard, Menton3, is also a musician. He's released an album under the name of Saltillo and on February 7th he'll be releasing his second album, a soundtrack for **Monocyte**, his comic co-written by Kasra Ghanbari from [IDW Publishing](#). The CD will be distributed by [Artoffact Records](#), who re-issued Saltillo's debut album Ganglion last year.

The first two issues of **Monocyte** are out now and it's definitely a large scale story deserving of a soundtrack. I've listened to the album a few times now and it fits the comic very well. Obviously that makes sense as the music is coming from the same guy that drew and co-wrote the comic. There are 12 tracks in all and they're unlike anything I've ever heard.

The **Monocyte** soundtrack was described to me as Industrial or trip-hop. I don't have much history with either, but I do

have an intimate knowledge of comics and movies. This album is one that you can sit back and listen to with your eyes closed and see a world-spanning film open up in your imagination. Fortunately, you don't have to do that with a comic book that goes with it. I've flipped through the first two issues of **Monocyte** while listening to this and I'm so much to the experience. I'm looking forward to the final two issues of the book so I can read the full story with the soundtrack playing.
