Nearly six years have passed since the self-proclaimed "greatest rock 'n' roll band in the world," the Supersuckers, released an album's worth of new material.

If good things do come to those who wait, according to singer/bassist Eddie Spaghetti, the wait for fans to hear the band's latest offering, "Get The Hell," was worth it.

"We have no business putting out a record this good this late in the game," Spaghetti said. "The response to the record has been phenomenal, as it should be, because the record is amazing."

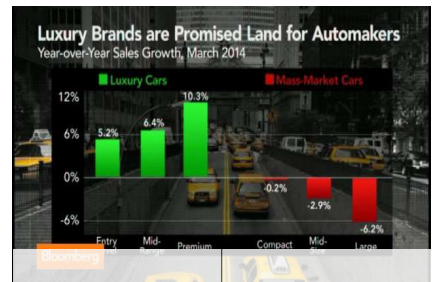

Fresh off a successful European tour, Spaghetti and Co. recently started an American jaunt in support of their new album co-headlining nationwide with '90s alt-rockers The Toadies.

The tour will make a stop April 19 in Cleveland at The Grog Shop.

What's This?

[cantonrep.com](http://cantonrep.com)

Both the Supersuckers and The Toadies got off the ground and found success in the early '90s, and Spaghetti said the two bands have quite a history together.

"We did a bunch of touring with them in the mid-'90s," he said. "We did a package tour with them, Butthole Surfers and Reverend Horton Heat. They're super cool dudes, and they write good songs. The tour just started but has been a blast so far."

The Supersuckers were two shows into their tour when Spaghetti talked via phone from Los Angeles about the group's history, the state of rock 'n' roll in America and the challenges the band faced in releasing their latest disc.

Q. It's been a while between "Get It Together" and your new album, "Get The Hell." You did a couple tours in between those albums, but also switched drummers and your record label folded. Where does "Get The Hell" rank in terms of how difficult it was to write and get in the hands of your fans?

A. "The (issues) leading up to getting the record made was staggering, but the actual making of the record itself was super easy. We had a lot of songs to choose from at that point, so we could use the cream of the crop. The writing and performing process with the new lineup is the best it's ever been. The communication is the best it's ever been. The energy is the best it's ever been. It's been a real inspiring process."

Q. After six years, was it a relief to finally get the record out?

A. "For sure. Especially after going through what we went through to get someone on board to help us put it out. After Mid-Fi (Recordings) went by the wayside, that process proved to be a lot more time consuming than any of us thought it ever would be."
