Gregg Allman

I'm No Angel: Live On Stage DVD

Review by G. W. Hill

This DVD is a recording of a concert from 1988. Gregg Allman and band were on fire and really put in a great performance. The video and audio are both quite good. If you want to see what Gregg Allman can be on the live stage, I can't imagine a better place to start. There are probably better concert videos of Allman out there, but this performance is strong enough that it really works well.
