

THE INDIANAPOLIS STAR

Speaking of music, MVD Entertainment has helped this winter go by quicker with some great releases. One is "Derailroaded: Inside the Mind of Larry 'Wild Man' Fischer, and his discordant encounters in the music business. Discovered by Frank Zappa, he was known as the godfather of outsider music.

MVD will be presenting other type of DVDs over the next few weeks.

"Anywhere USA" arrives March 22 and promises to be a comedy of manners in a redneck sort of way, starring Perla Haney-Jardine ("Kill Bill."). It played at the Sundance Film Festival, ingeniously meshing high art with a "Dukes of Hazard" type of setting.

MVD's "Alien 2 on Earth," due March 22, is a Midnight Legacy flick about flesh-eating creatures from a living rock that sits in a cavern and is discovered by cave explorers.
