Recorded in January 2011, seminal 60's pop band The Zombies revisits nuggets from their storied catalogue of pop masterpieces. Speaking of masterpieces, the bulk of the material featured in this live concert stems from the group's arguably best-known album *Odessey & Oracle* and rightfully so. Songs like *She's Not There*, *Time of the Season* and *Care of Cell 44* remain timeless, even 40-plus years later.
