SCOTT COSSU TRIO/Islands:

The world was full of promise for Cossu back in the mid 80's when his new age flights often flew the new age coop and let his world wide musical heart beat where ever it wanted. With liberal doses of jazz, classical and NAC in his mix, he was soaring to new heights before getting his head split open. Evan that couldn't contain him. Back from when the world was a lot younger and the sky a lot brighter, Cossu, his sidekick Van Manakis and Eddie Wood served it up with a lot more gusto than a new age trio should have. A nice return to glorious days of upbeat, tasty music that 80s adults in the know knew all too well.
