This week's DVDs feature white-boy afros, plastic hats and other punk-rock oddities.

### [Dead Kennedys - \*The Early Years Live\* \(2005\)](#)

#### The Early Years Live

San Francisco's Dead Kennedys are quite possibly the most beloved American punk band, ever. *The Early Years Live* provides a pitch-perfect representation of the band, utilizing nothing more than vintage footage and a nightly news feature of Jello Biafra's mayoral candidacy. The disc presents nine performances (one song each) that occurred between 1979 and 1981. DK belts out the songs at an astoundingly fast pace; Jello writhes and contorts his face; and there are more anti-American slogans than at a Communist Party meeting. In other words, this is American punk in its prime, and should be mandatory for teens considering a dive into punk life.
