This DualDisc is as the title says... 1980! This is a CD and live DVD all on one disc. It takes you through eighteen songs of memories. With the song *Whip It* you feel nostalgic, remembering how you used to dance to it while flinging your hair in circles. *Girl U Want*, *Planet Earth* and *Uncontrollable Urge* is more than a visit to the past.

The DVD side has the live concert, song selection and bonus features. The live concert starts out with a bit of background on Devo and what their name means. Devo wore these hats that look like upside down collapsible cups on their heads while wearing white jumpers. It's kind of funny how it reminds me of the movie, *Revenge of The Nerds*.

TVT Releases "Crunk

These songs could bring you back to thinking about the music you used to listen to when you were younger. Of course some of the songs are not the greatest but they do reflect the 80's and this CD/DVD will show the kids what music was like then.
