This week's DVDs feature white-boy afros, plastic hats and other punk-rock oddities.

#### Kick Out The Jams

The Motor City Five have been praised for inspiring English punk rock, empathizing with the Black Panther movement and cultivating impressive white-boy afros. The *Kick Out the Jams* DVD is not a documentary; nor does it provide any straight-forward live footage. So what is it, you ask? Well, this DVD is a pastiche of rare and live footage of MC5 doing what they do best: kicking out soul-saturated, freakout rock and roll. But again, this is not a straight treatment. We are treated to a kaleidoscopic psyche-out of swirling predigital special effects, all to choice MC5 songs. This the perfect disc for late nights spent in your basement's black-light chamber.
