BAD MANNERS-Live in Concert: Don't Knock The Bald Heads- MVD

I like a lot of things about a ska band like Bad Manners so I was certainly excited to open up the package and see this DVD sitting on top. The first thing I like is the roots they have. Not necessarily in the ska scene, but themselves. This live DVD features great covers from the set opener "In The Mood" to "Too Good To Be True" to "Wolly Bully." Anyone that reads this zine knows I am a sucker for good oldies tunes so I was pleased. The next thing I like about Bad Manners is that they aren't too proud to poke fun at themselves with songs like "Fatty Fatty." And finally, Bad Manners like to have fun. This isn't a show it's more of a party and they are the band. It wouldn't surprise me to see the guys in Bad Manners drinking at the gig with their fans after they play. This is a wonderful DVD that features 25 live songs including a killer Medley (England Football Medley). If you are looking for something that is just pure fun then you found it.(JK)
