Comments: In the early 1980s, the Bad Brains emerged as everything a hardcore punk band was not supposed to be: virtuosic, for one thing. Rastafarian, for another. Yet at their peak they thrashed better and more compellingly than almost all of their peers, and when they switched (on a dime) from speed-of-light hardcore into slow and smoky reggae, the effect was electrifying. This DVD finds them at the top of their form, playing the legendary CBGB's in New York. Prepare to be disturbed by singer HR's almost manic absorption in the music, and impressed by the DVD's sound quality. (RA)
