They might be going out of business, but Tower Records, alongside MVD Entertainment, will debut a Bad Brains DVD at Chicago punk haunt Delilah's on Tuesday, October 17th.

*The Bad Brains — Live At CBGB 1982* captures the pioneering Afro-punks shortly after releasing their self-titled debut and already nearing their creative apex. Beginning a three-day stint on Christmas Eve as part of a hardcore festival, the set includes "I And I Rasta," "Supertouch/Shitfit," "Supertouch," and "Banned In DC."

Doors open at 7 p.m. and along with free admission (space permitting), everyone in attendance will be able to buy the DVD at a discount.
