

THRASHER

January 2007

And if you wanted to see the **Bad Brains** in 1982 but weren't born yet, there's a way to do that as well. "Live at CBGB 1982" features an hour of footage from three back to back shows by the band, when they were at their best (that is, before they put out "I Against I" and HR lost it in a world of homophobia-fueled nonsense). Their hardcore stuff is still some of the most furious shit going, and HR goes apeshit (as does much of the crowd). There's not much else to the disc by way of bonus stuff, which is disappointing, but at least you can easily skip the slowed down reggae stuff they were playing. Maybe with some of the proceeds of this one the band can pay back the money they owe **the Big Boys**...
