U.K. SUBS relevance in punk music has been sealed in a concrete bunker forever more, as leading exponents of the oi movement their music, style and politics have been burned onto punks national consciousness for all to enjoy, but 25 years onwards it seems a little silly watching the bloated members try to seem committed to a message that a) hasn't dated well and that b) they probably shouldn't really believe anymore, at their age. An exciting show? Maybe. Chock full of their hits, for sure! A fan purchase only, definitely!
