## LA & NY Screenings For New Pixies Doc

by Staff | 11.09.2006

*LoudQUIETloud*, the new feature-length documentary on **The Pixies** reunion was released on DVD this week and to celebrate there will be a couple of free screenings. Fans in New York will get a chance to check out the film November 9th at the **The Glass Lands Gallery** in Brooklyn. While over on the west coast there will be a screening November 25th as a double feature with **Mission Of Burma's** *Not A Photograph* at the **Knitting Factory** in Hollywood.

The film documents the band's successful 2004 reunion all the way from their first rehearsals to the completion of their sold-out world tour. Singer/guitarist Frank Black recently stated that the band has begun working on their first new album since 1991's *Trompe le Monde*.
