## Musical Gift Ideas

From a Skynyrd belt buckle to the new Nas album, what to buy the music lover on your list.

by Brent Baldwin

### For the alternative minded:

Veteran crooner Tom Waits always delivers the goods. His latest, "Orphans" (\$49.98), is a three-disc set of riches, rarities and unreleased material that would make a nice gift for anyone who appreciates creative and heartfelt music. A lot of indie rockers dig the Pixies. You could grab their latest DVD documentary, "loudQUIETloud" (\$19.95); it's an in-depth, all-access account of how they don't get along offstage. If neither of those sound right, how about a subscription to either The Believer, with the great Wholphin DVD series included (\$80), or the Internet service LimeWire (\$50), which allows you to download songs to your heart's content.
