loudQUIETloud: A Film About the Pixies

Movie picked on Nov 02, 2006

The Pixies have reformed! Although we should not expect another "Doolittle", fans should check out this interesting documentary about the group. The film captures everything from the start of reforming (reunion) to 1st rehearsals to touring to more.... Kim Deal's addiction, the family of Black Francis, the magic and poverty of Dave Lovering, and the children of Joey Santiago. There is also a great live version of "In Heaven".
