

### **WORKHORSE III – CD**

This female-fronted group plays the sort of music that straddles the borderline between punk rock and straight-up guitar rock, but more towards the rock side; then again, so do the SEW-ERGROOVES or DEAD MOON, and those bands rule. I can't believe this band is a three-piece because the jams are solid with crisp drumming, deep bass lines, and noodling guitar riffs all over the place. Now I'm hearing more of a RUNAWAYS meets the CULT or ZEKE or something, and I should confess that this might be a bit too *rawk* for my tastes. But then again I have some friends who would totally eat this up and those guys are much cooler than me, so what do I know? (BG)
