Bullet For My Valentine: DVD

Live at Brixton January 28th, 2006

Among the thousands of screaming British youth stands one of the U.K.'s most popular metalcore bands around today. This DVD features the entire concert which was shot flawlessly using multi-camera angles set all around the venue. I was also impressed with the amount of extras featured here as well. Music videos, documentaries, and other insightful information on the band are overflowing on this title. Fans of the band will absolutely go nuts over the material on this DVD and rightfully so. There's a lot more on this disc that I didn't touch on but if you're a fan of these lads, you should definitely own this disc. -Matt Edmund *Trustkill Records*

Guns And Roses: DVD

Collector's Box

If you are one of those die-hards that have to have everything that has to do with G and R then maybe this DVD might be of use to you. If you are someone that is trying to find some live footage of the band and want see what you missed out on then I would not recommend this DVD. I don't think the G and R had anything to do with this DVD. They showed the same four pictures of the band, they did not play one G and R song and the graphics were mediocre at best. What they did do is interview people that seem to be serious Guns And Roses followers who were really stoked to be on a Guns And Roses DVD. This DVD does give a lot of little tid-bits about the band especially in there early years from people who claim they were there friends in the beginning. So if you get this DVD don't expect to be dazzled by the grandeur of Guns And Roses, expect to get a lot of info from people that really really liked the band. -Diego Del Scorcho *MVD*

Guns And Roses: DVD

Collector's Box

A good description of this DVD is it blows balls like a skanky whore in Vegas. I was so excited for this DVD because GNR rules and it's so fun to see them talk shit on each other and act like crazy men. That is not what you get with this DVD. I was expecting like a VH1 *Behind the Music* type thing. Instead it's full of shitty graphics that look like they are from the '80s when I played Oregon Trail and people who "swear they knew them." Good for you, but I don't want to know about you and how you went and saw them at a show. I want to see footage of the band rocking out and see what they were/are really like. I feel bad for anyone who buys this. Even if you are a super GNR fan you will want to murder someone if you buy this. No joke: they showed the same picture of Axl eight times. Oh, and the beginning of the DVD it has a disclaimer that says they can't play any original music from GNR, etc. No bueno! -JM *MVD*

Manowar: DVD

The Day the Earth Shook

This is one of the most insane DVDs ever. Manowar is in Germany, they're playing to probably half of the population of the world, and it is just one of the most incredible and ridiculous things to watch. These guys bust some sick ass solos, play some great metal, and have the crowd do absolute battle cry chants and yells. If you've never seen a million people pump their fists at the same time or yell in unison, you need to check this out. It's packed with footage too. So much footage to go around, you can watch the whole thing and discover you've become a missing persons. Check it out, even if you're not into metal or Manowar, you still need to watch it. -Alex Stitch *Magic Circle Music*

Plasmatics: DVD

This is quite an inspiring DVD on the Plasmatics. It takes you through all the ups and downs of the band. It shows how kick ass Wendy O. Williams is and how she never ever let up on her ideals. How she did all her own stunts and what the band wanted and did accomplish. She is an inspiring woman, a role model that surpasses gender and has definitely entered my fantasy file. Every punk rocker period should see this DVD. -Diego Del Scorcho *MVD*
