Film Reviews: The Deadly Spawn (1983) - By Duane L. Martin

Posted on Saturday, March 03, 2012 @ 10:42:52 Mountain Standard Time by Duane

Two campers are startled one night by a meteor that slams into the ground near their camp site. After finding out what had occurred, one of the men goes back to the camp to find the flash for their camera so they can take photos of the large space rock. Unfortunately, while he's back at camp, his friend gets himself eaten by non other than...BUM BUM BUMMMMM!!! The Deadly Spawn! It doesn't really matter though, because he himself is eaten inside their tent not long after. I guess he never did find that flash. Oh well.

From this point, the creature takes up residence in the basement of a near by house, and once inside, starts spewing out little baby critters and eating everyone they come into contact
