Genghis Says...

For some reason, Dokken tunes have been playing like crazy in my head for the last couple o' days. Not complaining.

The Deadly Spawn

T SD T

originally released in 1983

The Deadly Spawn has been recently resurrected and put on Blu-Ray or its millenium edition . Unfortunately missed this one the first time around so thought it had to be good if it was getting re-released after all o these years. Basically its your classic 80s horror/ sci- i c k in which aliens come to earth via a meteorite and start de ouring humans. The first to go are a couple o campers and then the toll starts to rise from there. The aliens take up shop in the basement o a house o an unsuspecting couple and start doing their dirty work. All hope is lost until a kid happens upon them and figures out how to outsmart the aliens before they take over the world.

This is one of those movies that surprises you when it shows up in some sort of elite package. It is a cult classic movie from the 70s that not many people have heard of and there is a reason for that this movie is mediocre at best. The story is okay but it drags like a mutha. You get to the point where you're scratching your head wondering why someone hasn't been noticed in a while. The acting is not the best and the monsters look cheesy but what really hurt this flick was the development of the story. The writer was so in love with developing the characters that he lost sight of the real purpose of the movie - aliens killing humans. Not horrible but it did get hard to watch due to boredom. I will say that I was impressed by some of the special effects. Not bad for a flick back in the day. The thing is once this one gets going it does turn out to be a pretty cool flick. Lots of gore.

Bottom line cult classic gets the royal treatment. Rated flick that takes too long to develop but once it gets going the gore is plentiful.

- **Ragman** thought about hitting the fast forward button more than a few times during the viewing of this one...
