## THE PLOT

A group of sexy women who think they are reporting to the set of a porn film get the shock of their lives when they discover they've been tricked into appearing in a horror movie — where they will be the real-life victims.

## HOWS THE MOVIE?

If you are a fan of wrestling and remember Shelly Martinez, who was in WWE's relaunch of ECW as Ariel and in TNA as well, then you will want to see the start of this film for sure. Actually, the nude women might just be the main reason to buy this one if you choose to pick it up. I mean we also have a cool looking killer, but things just seem to move too slow for my taste and it never seems like we ever gain any real momentum as things move along. I don't like any of the characters and the movie never does give us much of a reason to like them besides the fact they are naked a lot.

It is more of a stalk and slash type of film above everything else. I'm sure teens will love handing something like this around due to the amount of naked women the film give us. When you are a teen or a kid that can go a long way. When you are an adult it can only go so far and I don't think this one brings much else to the table other than that. Still, any wrestling fan will be more than happy to see Shelly Martinez. You can't go wrong with that, even if the plot lacks and the characters aren't interesting at all.
