ABOMINATION/Self Titled (Metal Mind Productions) This I remember back in the early 90's and this still sounds fresh today. The band get a nice clean production and this almost reminded me of like a thrashy Carnivore at times. The tunes hit hard and fast as this is some furious music to say the least. Paul Speckman belts out the tunes and damn his guitar player does he lay down some of the best thrash riffs. This is some killer shit and includes 3 bonus tracks and if you are a thrash fan, you must own this now or call yourself a poser. Paul sounds awesome on the mic and he belts out the lyrics with passion and feeling not matched by many. Info:
