Lee (Scratch) Perry - "Revelation"

Whatever Perry is on these days, I want some. At the tender age of 74, dub's maddest professor is still making with the freak-freak. His zillionth CD finds him pondering Jacko's nose, banning the FBI from his birthday and basically babbling about heaven knows what else over slow-burner reggae grooves, anything-goes overdubs and psychedelic effects. Stock up on Doritos.
