"Alien 2 on Earth"

Finally on DVD

Amos Lassen

Ripped off from the "Alien" films, "Alien 2 on Earth" is about a group of explorers who find a living rock in an underground cavern. They don't know that within it are flesh eating creatures whose goal is to do away with the human population on earth. This group of friends began their expedition into the cave just as a meteor shower takes place and a space shuttle comes to earth without any of the astronauts. One of the friends picks up one of the meteor rocks and takes it into the cave and it brings forth an unfriendly alien.

This is a really weird movie and very creepy. **Ciro**

Ippolito using the name Sam Cromwell wrote, produced and directed the film and there I something about this movie, with all of its faults, makes us want to like it. It drags and the script is quite weak but that is okay because the movie has other things to make up for its faults. I am not going to say what they are for to do so would mean I would have to give away the plot. The cave sequences are made quite well and there is tension there.

I had a great time watching it and if you put everything aside and sit down with a clear mind, you will have the same experience. There is a Blu ray version of the movie as well.
