ANAL STENCH/Red Revolution (Metal Mind Productions) This I thought based on the name was going to be some grind metal, but it is death metal played with lots of speed. The band play at a mostly fast speed and have a few breaks here and there. The music is decent, nothing that knocked me out of my chair, but it was far from sucking. The vocals are good as the singer has a strong death metal voice and doesn't go into any of those annoying screams or super low vocals. He just belts out the lyrics with good death metal growls. Production is good as well. Not bad.
