KRUK/Before (Metal Mind Productions) This is a rock n roll band and I just didn't think they were very good. The songs were flat and the singer just seems he tries to sing these songs too hard and he came across to me as fake and boring. I hate the keyboard parts and they to me just bring the band down and make the band mellower and to me that hurts this band. The guitar sound isn't bad and when the guitars shine and the keyboards fade is when this band sound best. The tunes just didn't prick my ears up and there is also a bonus dvd of live footage and interviews and stuff as well. Info:
