I NEED THAT RECORD

This Week In DVD: July 27th

[Features](#) By [Rob Hunter](#) on July 27, 2010 | [8 Comments](#)

Join us each week as Rob Hunter takes a look at new DVD releases and gives his highly unqualified opinion as to which titles are worth BUYing, which are better off as RENTals, and which should be AVOIDed at all costs. And remember, these listings and category placements are meant as informational conversation starters only. But you can still tell Hunter how wrong he is in the comment section below. This week sees only one

major release in Clash Of the Titans alongside several lesser known titles like Artois the Goat, Ip Man, Operation: Endgame, The Snake, and more. See all of this week's relevant DVD releases after the jump...
