Paul McCartney Really Is Dead Reviewed

I, not quite as mysteriously as Highway 61 Entertainment, received my package yesterday. Inside was the newly talked about find of the century, George Harrison's Last Testament telling us that Paul McCartney Really Is Dead (also the title of the DVD). Only, I knew it was coming in return for a review, an HONEST review, and here it is: This is complete rubbish! Besides the historical mistakes (Let It Be was not the last album recorded by the Beatles, It's Only A Northern Song was written by Harrison, not Lennon/McCartney, and there's more - but besides those screw ups, the voice couldn't sound less than George Harrison if I'd have done the voice myself. The man who sang harmony on Maxwell's Silver Hammer can't even say Maxwell on this tape, it's "Moxwell." I could knock this DVD forever, but my biggest disappointment is that wienerworld.com is somehow involved in this crap, a company with a good reputation with it's Rare and Unseen series. I can't even label this movie. It's not comedy, not entertaining, it's not serious, not satire, it's not documentary, it's not worth seeing - Wait, I just stumbled upon a label: Not Worth Seeing, and it's really not. I got a massive headache sitting through it till the end. The main gist, it seems to me, is that someone thinks Paul is an arrogant bastard and wants to knock him down via this video. Most all Beatles fans will surely hate this movie. And, for those in the know, I think I now know who 'iamaphoney' is on Youtube's Rotten Apple series. The similar video style is unmistakable 'in places', but even if you like those videos, this will disappoint even you. If you want to throw your money away, you'll be able to buy it Sept 1st. ~ #9
