[Idiots Still Think Paul Is Dead; Next They'll Go After George and John:](#)

Did Paul McCartney die in 1966 and get replaced by a lookalike? Of course not, you moron, he wrote some of his best work after 1966, but that and multitude other facts are ignored in the new documentary *Paul McCartney Really Is Dead: The Last Testament of George Harrison*, which promises to include audio of George Harrison (or someone with a Liverpudlian accent, at least) mumbling about how Paul was dead all along.

Never trust a conspiracy theorist. They write their own fan fiction for reality. If something is remotely possible under the confluence of various near-impossible, convoluted and coincidental events, then it for sure happened, unless of course there is a single shred of solid proof, in which case it's all lies you're being told in order to hide *the real truth*, which we'll tell you just as soon as we've finished smoking this monster bowl.

This documentary is going to make the famous 9/11-themed lie-fest *Loose Change* look like *The Thin Blue Line*.
