New Paul Is Dead Documentary Proves Paul is Alive!

Paul McCartney Really Is Dead: The Last Testament of George Harrison (Highway 61 Entertainment DVD 2010)

After a lengthy delay obtaining this alleged documentary prior to its official September release, it finally arrived in my mailbox. Here is my analysis.

The film starts on a serious note with our director Joel Gilbert, who explains that his Hollywood office received a package from London with no return address on July 1, 2005. The package, which has lots of pretty British postage stamps on it, contains a mini cassette recorder and two tapes labeled "The Last Testament of George Harrison". Gilbert claims to have hired no less than three audio forensic experts who have all tried to authenticate "George's" voice. The results were "inconclusive, but the tape contained shocking revelations". So let's see here, we can't prove the tapes came from George Harrison, but they still have some really amazing information on them, so let's make a documentary! Hmmm.

Here's a shocking revelation about the tapes from this Beatles historian with no "audio forensic" training. These

tapes are a fraud. The imitation of George's voice is one of the worst Scouse accents ever. My daughter at age 12 did a better George Harrison imitation than these tapes. So, the Rock And Roll Detective can unequivocally conclude that the entire premise of the DVD (Paul died in an accident and The Beatles-under threats from the MI5- covered it up, but gave us clues along the way) is total bullshit.

Read no further if that is all you want to know. However, if you want a play-by-play of the most ridiculous Beatles fiction ever, read on...
