Emerson, Lake and Palmer: 40th Anniversary Reunion Concert (MVD)

This reunion concert by this bloated prog rock trio shows that, although the musicians are a little grayer and a little heavier, their undeniable chops are still there: Carl Palmer's propulsive drumming, Keith Emerson's keyboard wizardry and Greg Lake's unique bass and voice. The concert, shot in splendid hi-def, has equally superb surround-sound which gives the music an extra oomph, notably the classical "cover" of *Pictures at an Exhibition*. The lone extra is an interview with all three group members.
