Steve Howe's Remedy - Live (MVD Visual)

This DVD features an electric performance by Remedy and a solo acoustic set from Steve Howe - both from 2004. Joining Howe in Remedy are sons Virgil on keyboards and Dylan on drums, Derrick Taylor on bass, and Ray Fenwick on guitar. Remedy are an incredibly tight live unit and serve the music very well indeed.

Most of the selections are instrumental and span the history of Howe's solo career as well as touching down in Yes territory. I must make special mention of 2 personal favorites: **The Nature Of The Sea** and **Lost Symphony**. So satisfying to hear & see such fine versions of both! Other highlights of the band set include **So Bad, Country Viper, Pennants**, and the solo section from **America**.

In the solo set, Howe delivers a section of **The Ancient, J's Theme, Mood For A Day, Second Initial, To Be Over, Intersection Blues**, and **Clap**. The DVD also includes a fun documentary of the 2004 tour. The sound is most pleasing; camera work is fine and uncomplicated. Yes fans will love this. Steve Howe fans will love this. Guitar fans will love this. Everybody wins!
