X - The Unheard Music DVD (Silver Anniversary Edition)

I've known about film for years but this is the first time I've seen in and I really rate it. As well as covering X who were one of my favourite bands in the 80's I love the fact that this movie also focuses on the LA alternative music scene in the late 70's/early 80's. It's all been repackaged and the quality is immense both audio and visually. If that wasn't enough all the band members get interviewed and this footage features seventeen tracks from their first four albums. In fact there's plenty of bonus footage on here making this release good value for money. There's so much raw energy and passion seen throughout this movie that many individuals / bands need to sit down and watch this. The reason being things are a little stagnant due to the internet, game consuls and other distractions but hopefully this film will re-ignite everyone's passion! Top movie! Faultless! 10/10
