User comments:**Brillian Insanity**

I loved the concept of Thankskilling from the moment I heard about it. A killer turkey movie. That sounded fabulous. And, even better, despite being cheesy, the movie is actually fairly good.

As might be expected, there are a lot of cheesy parts to the movie. Most of the time, our killer turkey is an obvious hand puppet. But it still works since the film is so obviously ridiculous.

The make-up was very well done. The blood and gore was great as well. The acting proved to be fairly impressive.

Naturally, with the movie being decidedly cheesy, there were a ton of bad puns in here. It was also funny how the characters were hopelessly stupid.

I can't wait for the sequel.

I give Thankskilling 8 out of 10.
