

By Bob Suehs

Live: Jailhouse Rock - DVD

Track Listing:

I always had a soft spot in my musical heart for The Divinyls because the band was a one hit wonder in the states but overseas they actually had a long musical career and released several records, toured many times and here in the USA they are only known as the band that did that "I Touch Myself" song.

Chrissie Amphlett always came off as a classy woman who had a very sexy style & appeal to everything she did both onstage & off.

This dvd captures The Divinyls live from 1993 and the band was actually a much grittier rock n roll band than most people realized because the twin guitar attack they had onstage rivaled The Rolling Stones and with Chrissie's sexy vocals over it that made some sexy assed rock n roll!

I can't find a bad song on this set, the entire show rocks! There's not much production as far as the live show goes, it's basically the band playing live onstage & the Divinyls deliver the goods when you watch this dvd!
