

ALICE DONUT - Freaks In Love DVD: This a full documentary on Alice Donut who's been banging out tunes for a quarter of a century now. The running time for this release is over 140 minutes with the documentary being 98 minutes long and there's 42 minutes of extra features. It's been an interesting 25 years for a band who have been leaders rather than followers. Everything is covered from their humble beginnings right through to the present time. There's a lot of ground covered and I love what I'm watching. Alice Donut are one of those bands that walked the talk and are still here to tell the tail. A brilliant watch! 9/10
