Zombie movies are a dime a dozen nowadays but fans just can't seem to get enough of them. I will admit I enjoy a good zombie movie as well, but I think the market is so flooded that it is difficult to find a good, original story line.

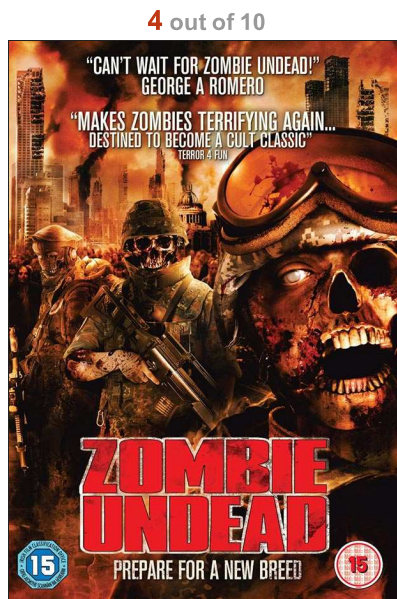

Zombie Undead looked promising, a story line based around a dirty bomb that is unleashed in a populated urban area; it was enough to peak my curiosity and compel me to watch. Unfortunately the only interesting thing about this movie is the plot line. I know it is a B movie but the acting is really one dimensional, and for lack of a better word, bad. The special effects (a necessity in this type of film) are really, really low budget and extremely cheesy, all of which makes it hard to muscle through the entire movie.

Die hard zombie fans might find this interesting, but it really did nothing for me at all.

Run Time: 79 minutes

Release Date: February 19, 2013
