

actually not a totally complete concert video although it's close!

What's interesting that the band are playing a stadium in this concert film & they lose some of that gritty charm that a rock n roll band has on a smaller stage because seeing the band play on a monster stage before an insane amount of people you kinda lose the raw power the band had on a song like "Tie Your Mother Down" & many songs on this set come off like greatest hits because they are played on such a large scale that the harder side of Queen was lost.

The impromptu jams like "Your So Square" by Elvis & "Tutti Frutti" by Little Richard are rare gems & I never realized Queen would jam like that & toss out covers to make the show fun....Freddie is the star of the show though!

Brian May's guitar 7 minute guitar solo was a bit of a let down because I was hoping he'd play a random selection of solo's but sadly he played a rather ambient & subdued solo that kinda bored me.

What I will tell you hands down is that this IS the definitive Queen live package & it's a must have for all Queen fans because you get it all with this set!

THE ROLLING STONES

"Under Review - 1975 - 1983 - The Ronnie Wood Years (pt 1)" DVD

Track Listing:

This documentary on The Rolling Stones emphasizes on the Ronnie Wood era of the band & it highlights just exactly how Ronnie really saved the band from falling apart after Brian Jones death.

There's a ton o' archival footage but sadly much of the bands music was not used in this documentary because it was not authorized by the band but the interviews, pics & overall production was quite good from a fan stand point.

BLOODY CHRISTMAS

This movie is interesting because it's not really a full on horror movie & I'll spoil it by saying the Priest is the killer!!!!

The last 20 minutes of the movie are the best because that's where the action starts...the movie starts out with a black girl slitting her wrist in the bathtub and I give it to the director of this film because they do lay out a decent plot, there's a story & while it's a b-movie it still maintains a certain level of cinematography although there were moments where the movie did drag just a little it was overall a fun watch.
