Almost a year ago, do you remember the real life face-eating cannibal Rudy Eugene due to, unconfirmed, street drug nicknamed “bath salts?” Eugene basically left his disabled vehicle near a Miami causeway, stripped completely butt-ass naked, and assaulted one Ronald Poppo by beating him down to the ground, stripping off his homeless man trousers, and proceeding to munch on the upper portion of his face. A real life zombie? Most likely not, but the more probable cause would be high as a kite on drugs, making him insane and almost superhuman-like. Reportedly, the attack went on for nearly 20 minutes and police even shot Eugene four times.

Not in the film, but I wanted you to have an idea of what to expect!

A year later, ambitious filmmakers came together with the “Miami Zombie” inspiration in mind and made a highly exaggerated, or was it, loosely based film about drug addicts turning into face biting zombies after smoking a bath salt resembler that is actually concocted from a highly toxic, military grade, weaponized substance that somehow mysteriously disappeared from the military’s inventory. Hot on the destructive addict’s tail is a relentless DEA agent who will stop at nothing to put an end to reign of bath salt terror!

Who are these ambitious filmmakers? And how the hell did they pull off a great fun and creative movie about the bath salt “Miami Zombie?” First off, the team of creators and actors behind that fantastic little Faustian film Night of the Tentacles (<http://itsbloginevil.wordpress.com/2013/02/01/talk-about-your-evil-heart-night-of-the-tentacles-video-review/>) were involved! Dustin Wayde Mills, whom very uncanny in looks and voice resembles Red State director Kevin Smith, directs, co-wrote, and also co-stars as the money hungry mad scientist behind the bath salt concoction. Night of the Tentacles lead man Brandon Salkil who is comically animated and has great facial features for film. Secondly, my main man Clint Weiler produced and co-wrote Bath Salt Zombies. Clint is also a head hancho over at MVD (<http://mvd2b.com/>), a major home entertainment distributor for music and DVD video!

Bath Salt Zombies combines 300 with Scott Pilgrim vs. The World. You have the epic fight scenes, done very well by the way with well done choreographers by co-star Jason Eal (DEA agent), with the Scott Pilgrim like animations that turn a cheesy premises into the next big indie cult film – the next Dead Next Door comes to mind. Now, I could be wrong, but I found that Bath Salt Zombies paid homage to a couple of other notable horror and action icons such as the first Resident Evil video game in the mini-cartoon intro at the beginning reminded me of first appearance of a zombie and the subway fight finale reminded me of Neo and Agent Smith duking it out in the first Matrix. However, Bath Salt Zombies delivers more blood and more creative style with the budget.

What I really wanted more from this film was Erin R. Ryan's twins in the shower. Along with Ryan's ta tas, Bath Salt Zombies offers other perks such as a fully frontal 4 minute scene of [DeviantArt](http://www.deviantart.com) (<http://www.deviantart.com>) and [Model Mayhem](http://www.modelmayhem.com) (<http://www.modelmayhem.com>) model Bella Demente! You also have a great punk Soundtrack to go along with the spew of blood, the elastic internal organs, the dismembered body parts, and the multiple decapitations. I highly recommend this movie to any comedy, horror, or drug addict fan because Bath Salt Zombies entertains with a blood, boobs and banter that hasn't been this witty for a indie film in such a long, long time! Well played!
