[WHO KILLED JFK? THE QUESTION STILL BURNS](#)

MUSIC VIDEO DISTRIBUTORS tackles one of the most famous conspiracy subjects there is: the assassination of John F. Kennedy. Of course, theories abound, from conservative assertions that the official version IS the truth to way-out-there conspiracy theory nutjob ideas. Interestingly enough, each of these DVDs comes with the words "THE SHOCKING TRUTH" glaring up from the cover. First up is the nicely titled CONFESSIONS FROM THE GRASSY KNOLL. This one presents an interesting take as it involves the actual confession from jail - where he was for another crime entirely - of a man who claims to be the person to have delivered the fatal wound to JFK's temple. The story of the interview is

engaging in and of itself. The original interviewer started bit by bit coaxing one James Files out of his shell back in 1992. But, close to success, he died in 1993. Nevertheless, partners of the original interviewee finished the work and recorded a confession. Plans were made to go national, on television, with Mr. Files, but before it could air, it was yanked. Some claim CIA interference. So this story about a conspiracy may be part of its own conspiracy. Interesting ...

SPOOKS, HOODS AND JFK takes a look at Chauncey Holt, a CIA operative who skulked the dreary criminal underground for years. His time spent with the bad guys and being a CIA agent gave him the chance to learn a few things - things which he wished to reveal in a video interview shot just a week prior to his death. This DVD contains that vid confession. We hear and see unfold a classic conspiracy idea, that government members themselves were responsible for the assassination of the beloved president. It's not a new idea but, certainly, this video may be a fresh examination of the hypothesis for some and a reaffirming for seasoned critics of the official version of events.

Finally, we see I SHOT JFK, in which the "real murderer reveals his secret." Guess who the "real murderer" is? James Files! yes, this DVD can serve as a companion to CONFESSIONS FROM THE GRASSY KNOLL and certainly offers an interesting possibility for the JFK conspiracy lot and anybody interested in the subject. This disc contains the last interview with James Files and will be a must for JFK completists and those who favor the Files hypothesis.

It's a conspiracy theorist's dream with this unleashing of a trinity of Who Killed JFK?/I Killed JFK! documentaries for ferocious fans of the matter to devour, consume and debate endlessly with fellow conspiracy philes.
