**REAPER IN SICILY – Islands:** Another UK band I've not heard of before but glad I've found them. Their hi-tempo rock sound shook away these Thursday morning blues. Ok so many would say they're not original but name me a band today that is original and you'd be hard pressed to name one. When you listen to tracks such as 'Boys Will Be Boys', 'Chuck Norris Got A Chainsaw', and 'Sunnydale Sucks' then you'll realise why I like them. Just listen to them guitar chords and bass lines. Blinding! My only grumble would be their band name! But hey not everyone can be perfect!

**RON ASHETON Tribute Concert DVD:** This is a heartfelt tribute to Ron Asheton and to the music he contributed too! For those who don't know this man he was the guitarist and co-songwriter for the Stooges before passing away in 2009. The main part of this concert evolves around Iggy Pop and the Stooges who perform some great tracks such as 'Raw Power', 'Search And Destroy', 'Open Up And Bleed', 'I Wanna Be Your Dog' and 'No Fun'. There's also a speech from Iggy Pop too. If that wasn't enough some of the Stooges songs include a string section which adds to their charm. Could it get any better? It sure does with appearances from Henry Rollins and Deniz Tek on guitar. A wicked release where all proceeds go to the Ron Asheton foundation! Buy it! **9/10**
