

surprising they've received awesome reviews in the likes of Terrorizer and Rock Sound. Just have a listen to these four new tracks and tell me they aren't going anywhere! I'd think you were nuts if you rubbished off tracks such as 'The Enemy Within' and 'All That Remains'. You'd be a fool to miss out on what I've heard on this EP. Great stuff from Immension. **8.5/10**

Self Released

Release Date: 12th August 2013

INFECTIOUS GARAGE DISEASE – S/T: If you've never heard this band before then you're in for a treat! IGD are an obnoxious late 1980's gutter punk band from Northern California! They were well known for annoying the fuck out of people with their politically incorrect songs. On this release you get to hear 43 of their numbers alongside over 45 minutes worth of video coverage. In fact this release is packed with lots of extras that add to the release. It was mad as fuck to hear tracks such as 'Fat Dykes On Welfare', 'Porno Junkie' and 'Psycho's On Speed' again. Not only do you get to here some cool music on this release but you also get some great packaging which includes decent sleeve notes. A well appreciated trip down memory lane here! **7/10**

Negative Reaction Records (UK) / MDV Audio (R.O.W)

LOST TRANSMISSION – **All The Time In The World EP**: This Geordie rock band release their debut EP and with influences from the Foo Fighters to the Manic Street Preachers you know you're going to get something good. There's five tracks on this release and not one filler but tracks such as 'All You Left Behind' and 'Mess You Make' did it for me. It's just a shame this release wasn't an album as five tracks just aren't enough! If you're looking for a new band to enjoy this band could be what you're looking for! **7.5/10**

Release Date: 17th June 2013

MYCELIA – **Nova**: I'm not a big fan of progressive metal but this album really grabbed my attention. My only problem is I think in places it's a little rushed and if they had given more time between albums they really would have a gem on their hands. The musicianship on this release is of high standard and each member certainly knows how to get the best out of their tools. Just have a listen to 'Shmashmortion', 'Dopamine' and 'The Golden Ratio' tracks and you'll understand why Mycelia are a decent band. Aside from great music you'll also find a decent production too! An album worthy of your attention! **8/10**

Self Released

Release Date: 15th July 2013

OUR FINAL HOUR – **The Moving House EP**: Our Final Hour release their third EP and it's not bad at all. They manage to incorporate punk, metal and HC with good effect and that's what makes this band stand out. The six tracks that you find on this release are of a decent standard and certainly worthy of telling the truth. Tracks that really stood out for me were 'Four Years', 'Autumn Breeze' and 'Evergreen' as they are tracks that I keep going back too! It's just a shame that I've never come across this band sooner! **7/10**
