A classified government project is underway to create a new weapon to combat the drug cartels. That weapon is a fast-growing, genetically engineered strain of mold designed to wipe out coca fields – the only problem is, this MOLD also feeds on human flesh. And when the murderous mildew is mysteriously released in a secret lab, it wages its own war on a group of unsuspecting scientists and military officials, who are forced to fight their way to safety while trying to contain the MOLD before it is unleashed on the world.

MOLD! is produced by Mentally Ill Films and written by Dave Fogerson and co-written by director Neil Meschino and stars Edward X. Young, Ardis Campbell, Robert Fattorini, Chris Gentile, Lawrence George and Rick Haymes.

Always watch out for those experiments that go wrong! OK, Mold! takes place in the confined setting of a secret lab, on a base where we watch things go horribly wrong really fast. The movie follows a small group of people, both military and scientist type who try to prevent this epidemic from spreading any further. We watch these people get infected one by one as they try to figure out what to do with this situation. Once infected, the fun begins!

I had so much fun with this cheesy, low budget horror romp! Mold! has a little bit of everything for the horror fan; it has that B movie vibe to it but it also has a big sense of humor. The movie doesn't have a lot of blood and guts but it is packing with this ooey gooeey crap once the people come in contact with it and when it starts, it doesn't stop. They go over-the-top with the gross factor and I freaking loved it! It looks like green thick snot taking over the world!

I liked everything about this low budget flick. Even though it is a small setting it plays as well as some big screen offerings, it is fast paced and keeps you interested all the way through plus you'll crack a grin during some scenes too. All of the acting is great and they all keep you interested with their characters! I'm really torn about what I liked most about the movie, was it the fun characters or was it the gross Mold!?

Bottom line is, if you're a fan of the horror classics from the 50s and those favorites from the 80s then be sure you check out Mold! when it releases on DVD on May 21st. You're going to have a lot of fun with this movie!
