Mold new from Wild Eye Releasing!

This is a great new addition to the Warning sign type films Genre. Mold is about an accidental outbreak of a Biological weapon in a lock down facility, the outbreak of course causes a lock down and a team of military and scientific officials are locked in with a mold spreading an infection, and anyone it touches turns into a possible flesh bubbling monster. We follow the cast as they fight the mold for their life and limbs , a lot of good actors in this film. great gore f/x and even the Cgi was tolerable i recommend checking this one out, possibly the best sci fi horror indie film I've seen this yr. RANK 8.5/10
