Evil United – Honored By Fire

Evil United – Honored By Fire (MVD)

A very heavy, pure metal band! That was what this band from Texas set out to achieve, and that's what they became. Their second release brings them even closer to that goal. At the core you can find a solid foundation of power metal and thrash metal, which give energy to half the lone star state. Featuring members of bands such as Riot, WatchTower, Murderdolls and a few others, there's a lot of experience of writing songs and penning amazing riffs. There are hints of Slayer, Overkill, Judas Priest, Exodus and several other bands whose influence Evil United carries on its sleeve and guitars. That sheer power, and musicianship, combined with a very heavy production and the will to use quite a bit of variation, makes 'Honored By Fire' definitely a contender for best 'pure' metal album of the year. Every single song is a reminder of that! **Martijn Welzen**
