IT’S SCIENCE FICTION – BUT NOT AS WE KNOW IT!

Starring **Carol Cleveland** (Monty Python), **Sophie Aldred** (Doctor Who), **Tom Price** (Torchwood) and **Chase Masterson** (Star-Trek Deep Space 9), *The Search for Simon* follows 39 year David’s search for his younger brother Simon, who, at the age of 7 (ish) in 1979, disappeared, due to a perceived alien abduction. After all, his Dad did tell him that he had been.

Completely devastated by the loss of his younger brother, and best friend, David vowed to find his brother – or at the very least find out about [the Aliens](#) that took him. This quest has taken over and completely filled David’s life. It’s more than a passion, it’s an obsession. David has been meeting people – filming interviews and generally obsessing over alien abductions ever since.

David’s best (and only) friend Robert, saddened by his friend’s obsession and unwillingness to let go of the past, tries his best to get David interested in other things: games, pub quizzes, re-enactment societies and even... women. And then one day after a chance random encounter with a [book](#) writing psychologist with an ear for obsession, he catches the eye of a pretty young woman, and everything changes...
